

**Revolution of NON-Chemical  
Green Scale Control Technology**

**SOFT-NO-R**

**GoodBye Water Softener...**

**WELCOME**

**SOFT NO R**

**Scale  
Of  
Fluid  
Treated  
NO Regeneration**

- Easy Installation and set up
- Long media life
- No Regeneration Required
- No Salt
- No Backwash
- No Electricity
- No Maintenance
- German Technology

SOFT NO R System eliminates previous scales within few weeks

**GERMAN TECHNOLOGY**

**FILTERSORB SP3 Media**

## Introduction

Why always pollute water with Sodium using water softeners? **PURE N SAFE** brings a neat and clean chemical free scale prevention and corrosion prevention **FILTERSORB SP3** media to convert hardness minerals to harmless inactive sub-micron crystals, making **SOFT-NO-R** series systems, the truly effective alternative technology to water softeners for the preventions of scale due to water hardness.

- **FILTERSORB<sup>®</sup>** media does not remove healthy minerals or add sodium to the water supply.

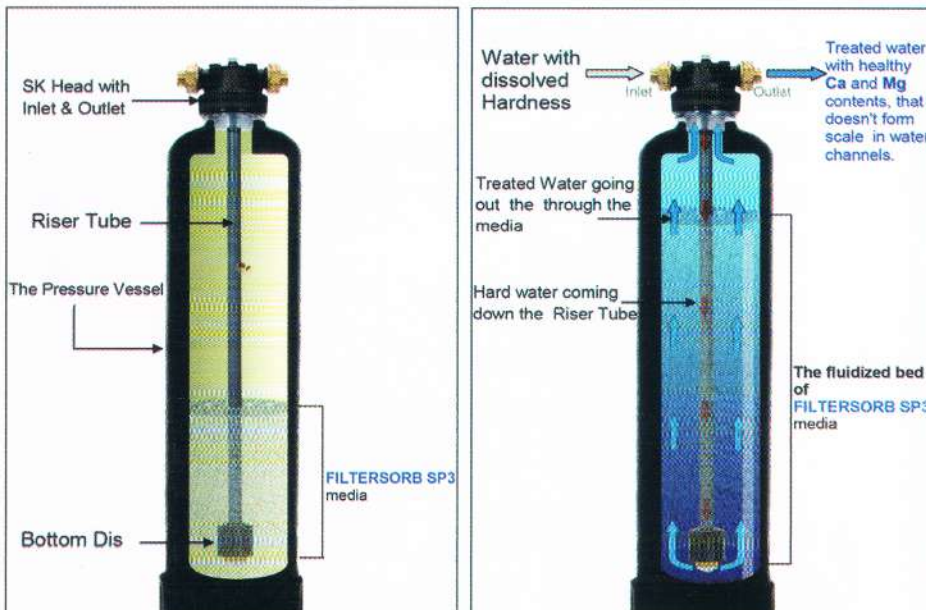

**SOFT-NO-R** systems can be installed as a pre-treatment to all reverse osmosis. No control valva, no electricity and no waste water - an absolute enviornmentally friendly "**GREEN**" technology. Simple sizing and installation - all you need is pipe size and the peak flow rate. Perfect systems for today and future for homes, towns and all communities where water softeners are banned. **SOFT-NO-R** systems are maintenance free; no salt bags or other chemicals to add constantly.

## Benifits:

- **Scale Prevention:** Scale deposits cause blocking and the failure of the water flow systems in households appliances (Washing machines, dish washer, coffe machine etc). A huge replacement cost for the pipes and the systems affected by the water hardness can be avoided using **PURE N SAFE SOFT-NO-R** systems. The shower, faucets, bath and sinks are now without the trace of any scale and washed clothes are cleaner and have the softness and nice colours.
- **Hygiene:** **PURE N SAFE SOFT-NO-R** scale prevention unit treated water is enriched with naturally occured CO2 in the water. The benefit & essence of CO2 enriched water is medically proven, that helps with skin problems, lusterless hair and has many therapeutic applications.
- **Health:** Unlike any water-softening unit that works in the basis of ion-exchange, that takes out Calcium and Magnesium from the water and pollute it with unhealthy Sodium **PURE N SAFE SOFT-NO-R** scale prevention unit preserves the two essential minerals Calcium and Magnesium in water. Making the water the best natural-mineral enriched drink available.
- **Economical:** **PURE N SAFE SOFT-NO-R** scale prevention is very economical. Easy installation, easy setup, no power consumption, no drain, no backwash, no salt consumption, no chemicals and almost no maintenance is necessary.

## How does SOFT-NO-R work?

**PURE N SAFE SOFT-NO-R** uses revolutionary **FILTERSORB<sup>®</sup>** SP3 media inside a pressure vessel which is running in a counter current mode. The up flowing water causes formation of a fluidized bed of the media. The immediate conversion of water hardness (due to Ca<sup>2+</sup> and Mg<sup>2+</sup>) gets converted into sub-micron harmless crystals when hard water passes through the media.

### For the first time in water industry

One can simply test out the **SOFT-NO-R** functionally using the "**Clear Yellow**" test.

- The performance of **SOFT-NO-R** units can be checked within a few minutes only through "**TEST KIT**".
- Only we have the "**TEST KIT**".

### More facts regarding SOFT-NO-R

**PURE N SAFE SOFT-NO-R FILTERSORB<sup>®</sup>** SP3 will be blocked H<sub>2</sub>S, oil and grease are present in the water. Iron and Manganese in the water shall be as per WHO. For 24hr per day operation we recommend a dual train unit. The **SP3** media is heat resistant up to 120C.
